Gentlemen:

Subject: Inspection Nos. 50-317/85-05 and 50-318/85-05

A radiological safety inspection of upcoming outage activities was conducted by Mr. P. Clemons of this office on March 26-29, 1985, at Lusby, Maryland, of activities authorized by NRC License Nos. DPR-53 and DPR-69 and to the discussions of our findings held by Mr. Clemons with Mr. Russell at the conclusion of the inspection.

Areas that were reviewed included planning and preparation, licensee and contractor personnel training, posting and labeling, and the low level waste storage facility. Our review of the preparations for the outage indicate the extensive and detailed efforts your staff has dedicated to preplanning, enhanced radiation worker training, and dose reduction consideration.

Our inspector also verified the steps you have taken to correct the violations and inspector follow-up items brought to your attention in the enclosure to our letters dated July 18, 1984 and January 29, 1985. We have no further questions regarding your actions at this time.

No violations were identified. No reply to this letter is required.

Your cooperation with us is appreciated.

Sincerely,
