

JUL 12 1985

Docket No. 50-354

Public Service Electric & Gas Company
ATTN: Mr. T. J. Martin
Vice President
Engineering and Construction
80 Park Plaza - 17C
Newark, New Jersey 07101

Gentlemen:

Subject: Inspection No. 50-354/85-24

This refers to the special team inspection conducted by Mr. S. V. Pullani of this office on May 20-24, 1985 at Hope Creek Station, Hancocks Bridge, New Jersey of activities authorized by NRC License No. CPPR-120 and to the discussions of our findings held by Mr. Pullani with Mr. A. E. Giardino of your staff at the conclusion of the inspection.

Areas examined during this inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Within the scope of this inspection, no violations or deviations were observed.

Fourteen items, including nine licensing related items identified in the enclosed inspection report as 50-354/85-24-05 through 13, remained unresolved at the end of the inspection. During the inspection, you committed to resolve these items expeditiously, to complete the procedural and administrative type of actions by August 15, 1985, and to complete the required hardware modifications by the fuel load. With respect to the nine licensing related items, you are urged to resolve the issues directly with our Office of Nuclear Reactor Regulation, in order to expedite the licensing process.

Information contained within the enclosed inspection report has been discussed with Mr. W. Pavincich of your staff on May 24, 1985. During this discussion, it was concluded that the inspection report contained no information that you considered proprietary; therefore a copy of this letter and its enclosure are being placed in the NRC's Public Document Room.
