

AFFIDAVIT

I Joseph J. Tryner swear that the statement I am about to give is true to the best of my knowledge.

I am an attorney in Will County, state of Illinois. I have in the past worked in this capacity as council for Jack and Martha Moran. As council for the Morans I represented them in negotiation for the easement rights for a 765kv transmission through their property. In 1980 we all talked with Mr. Bob Kinney of the Commonwealth Edison Co.

There are two issues that I would like to bring to attention at this time that are relevant to those negotiations::

1. At no time did Mr. Kinney state <sup>to me</sup> that the construction of the 765kv line was dependent on the construction of two additional nuclear units at Braidwood. *JK*

2. It was defininately the objective of Commonwealth Edison to obtain easements for both a 345kv line and a 765kv line at the same time in 1980. There was never any discussion of construction being put off until the turn of the century.
