NUCLEAR REGULATORY COMMISSION
REGION IV

611 RYAN PLAZA DRIVE, SUITE 400
ARLINGTON, TEXAS 76011-8064

OCT 23 1996

Mr. C. L. Terry
TU Electric
Group Vice President, Nuclear
ATTN: Regulatory Affairs Department
P.O. Box 1002
Glen Rose, Texas 76043

SUBJECT: NRC INSPECTION REPORT 50-445/96-13; 50-446/96-13

Dear Mr. Terry:

An NRC inspection was conducted October 4-11, 1996, at your Comanche Peak Steam Electric Station, Units 1 and 2, reactor facilities. The enclosed report presents the scope and results of that inspection.

This inspection consisted of observations of nondestructive examinations, documentation reviews, and discussions with plant personnel associated with the inservice inspection program. Our results indicate that your inservice inspection program continued to be a well implemented program.

One unresolved item was identified concerning nonconforming motor operated valve actuator fastener configurations. This matter is discussed in Section M2 of the enclosed inspection report. Your staff updated the NRC on the latest actions implemented to address this unresolved item during an October 16, 1996, followup telephone conference call. This item is unresolved pending NRC further review of this equipment fastener problem and your corrective actions.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room (PDR).

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Kenneth E. Brockman, Acting Director
Division of Reactor Safety
