Re: License Amendment  
License No. 06-19549-01

Gentlemen:

As a result of a recent license inspection, conducted by the NRC Region I office, it has come to our attention that our license should be amended in several respects.

License Condition 16 requires that the licensed material be possessed and used in accordance with statements contained in our application dated September 24, 1980. The following revised information is provided so that we can remain in compliance with Condition 16:

Item 6 - Change to read

- a) Arthur Gruhn
- b) Wayne Blair
- c) Derrick Schull

In addition to the locations listed under Item 13b, we will be establishing a third field office in Newington, CT. within the next few months. When the office is established, we will have a requirement for use and storage of a moisture density gauge at that location. Please advise whether it will be necessary to make a further amendment to our license at that time to show the exact location for storage.

We are enclosing, herewith, a check in the amount of \$40.00 to cover the fee for the necessary license amendments. If any further information is required, please contact our office.

Very truly yours,

KASPER ASSOCIATES, INC.
