Dear Mr. Dorgan:

I listened to a speech by Helen Winsor a couple months ago. I also had an opportunity to talk with him for a few minutes. He is a senior health physicist and a specialist in radiation waste handling techniques. He has worked in every phase of nuclear weapons and commercial utilization cycles.

I would like to know why the Nuclear Regulatory Commission refused to accept his bid to handle all the nuclear waste from one power plant for a price of approx. \$2,700⁰⁰ per day when they are paying \$27,000⁰⁰ per day now? also Mr. Winsor quoted the repair work at Three Mile Island and specified that he would have it back in operation in 6 weeks. They also refused to accept his bid. That means millions of dollars a day are being wasted. No wonder you fellows can't balance the budget.

Sincerely, Lawrence A. Durkin
C.C. rep. Hargrave
P.S. Dear Mr. Dorgan, Please check this out & advise, also, thanks for your Very Conservative Voting Record. L.
