Ref: Amendment to License No. 20-14079-02  
(Docket/Ref. No. **030-29152**)

Dear Sir/Madam:

Please be advised that TGM Detectors, Inc. will be moving its gas-filled radiation detector manufacturing business to 5 Eastmans Road, Parsippany, NJ 07054. Therefore, we wish to amend Condition No. 10 of our NRC License to reflect the new location of our Krypton-85, Californium-252 and Americium-241 sources. Additionally, please amend Condition 11.A to read "licensed material shall be used by, or under the supervision of Kyriakos M. Tsorbatzoglou." Mr. Doyle, O'Shea and Jones have recently left the firm. All operations and uses of the licensed will be the same as previously stated in our license application. The new facility layout and source locations are noted on the attached floor plan.

Lastly, prior to release of our facility at 160 Bear Hill Road in Waltham, MA, we will have our consultant Mr. David J. Allard, CHP perform a complete facility radiological survey. He will also assist us in the packaging and labeling of these materials for transport to New Jersey. Our estimated move date is April 22, 1996. Therefore, we would greatly appreciate your prompt review and approval of this license amendment. If possible, please fax (617/890-4711) your amendment to my attention. The original and invoice may be sent to our new address in New Jersey. Thank you.

Sincerely,

  
Kyriakos Tsorbatzoglou  
Radiation Safety Officer
