Gentlemen:

This refers to your letter dated November 13, 1984, sent in response to our October 3 request for additional information. We find that you still have not provided adequate information concerning instrument calibration or leak test analysis.

As explained in our October 3 letter, individuals or companies providing instrument calibration or leak test analysis services must be specifically authorized (licensed) by NRC or an Agreement State to perform such services. Otherwise, you must submit, as a part of your license application, complete information concerning these procedures. Mr. Panetta does not appear to be licensed to perform these services. It is also not acceptable to simply refer to another license which only includes Mr. Panetta by reference, especially when that license authorizes totally different activities.

Please note that License No. 29-14966-01 issued to Freehold Area Hospital provides no information concerning leak test analysis procedures and that we are unable to find any reference to Mr. Panetta in License No. 29-12167-01 issued to John F. Kennedy Medical Center. Again, you should refer to Items 10, 11, 15, and Appendix A of the enclosed well-logging guide and provide complete information as requested and also identify the license which authorizes Mr. Panetta to possess or use the specified sources for instrument calibration.

You are hereby notified that unless within 30 days from the date of this letter we receive the additional information requested, it may be necessary for us to deny your application and terminate your license. Such action would require that you divest yourself of all licensed material.

Our review of your application will continue upon receipt of the above information. Please reply in duplicate and reference Mail Control No. 17992.

Sincerely,
Original Signed By
J. Bruce Carrico
