

NOTICE OF VIOLATION

Adams Industrial Services, Inc.
Virginia Beach, Virginia

Docket No. 030-34082
License No. 45-25355-01

During an NRC inspection conducted August 29, 1996, violations of NRC requirements were identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," NUREG-1600, the violations are listed below:

- A. 10 CFR 71.12 states, in part, that a general license to transport licensed material, or to deliver licensed material to a carrier for transport, applies only to a licensee who has a quality assurance program approved by the Commission as satisfying the provisions of subpart H of 10 CFR Part 71; has a copy of the specific license, certificate of compliance, or other approval of the package; and submits in writing to NRC, prior to the first use of the transport package, the licensee's name, license number, and package identification number.

Contrary to the above, as of August 29, 1996, the licensee routinely transported licensed material under the general license pursuant to 10 CFR 71.12, and the licensee did not have a quality assurance program approved by the Commission and had not submitted in writing to NRC prior to the first use of the transport package the licensee's name, license number, and package identification number.

This is a Severity Level IV violation (Supplement V).

- B. 10 CFR 34.20 requires, in part, that each radiographic exposure device must have attached to it by the user, a durable, legible, clearly visible label bearing the licensee's name, address, nor telephone number.

Contrary to the above, as of August 29, 1996, the licensee did not have attached to its Spec 150 exposure device its name, address, and telephone number.

This is a Severity Level IV violation (Supplement IV).

- C. Condition 20 A. of License 45-25355-01 requires, in part, that the licensee possess and use licensed material in accordance with statements, representations and procedures contained in the licensee's application dated February 21, 1996.

Item 5.5.1 of the application requires, in part, that areas used for storage shall be surveyed, at least, every time the area is to be entered and the results of these surveys shall be recorded on the "Storage Area Survey Report Form".

Enclosure

Contrary to the above, as of August 29, 1996, the licensee had not performed surveys upon entering its storage area since July 18, 1996, and the storage area had been entered on August 14, 1996, August 19, 1996 and August 23, 1996.

This is a Severity Level IV violation (Supplement IV).

Pursuant to the provisions of 10 CFR 2.201, Adams Industrial Services, Inc. is hereby required to submit a written statement or explanation to the Regional Administrator, Region II, with a copy to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. Your response may reference or include previous docketed correspondence, if the correspondence adequately addresses the required response. If an adequate reply is not received within the time specified in this Notice, an order or demand for information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Dated at Atlanta, Georgia
This 23rd day of September, 1996
