Syosett, NY 11791

Gentlemen:

This refers to your letter, dated November 13, 1984, sent in response to our October 3 request for additional information. While your letter has provided us with some information, we find that you did not completely respond to our request. Therefore, we will need additional information and/or clarification of the following:

1. In our recent telephone conversations, we discussed the radiation safety officer position for your license. It is our understanding that Mr. Anthony Giaimo will act as RSO for your license rather than Patrick Panetta. Please confirm this understanding.
2. After conversations with our Region I Office and our Office of State Programs, we are unable to find information to show that Patrick Panetta is authorized to provide instrument calibration or leak test analysis services to NRC licensees. Individuals or companies performing such services must be specifically authorized by the NRC or an Agreement State. Therefore, you should either identify the license number which authorizes Mr. Panetta to provide these services or submit, as a part of your license application, complete information concerning instrument calibration and leak test analysis procedures. Please refer to Items 10, 11, and 15 and Appendix A of the enclosed well-logging guide for the type of information which should be submitted. You should also identify the license which authorizes Mr. Panetta to possess or use sources for instrument calibration and submit copies of the leak test result and instrument calibration forms provided to you by Mr. Panetta for your recordkeeping purposes.
3. We will need confirmation that you will conduct job site surveys at well heads before and after use of licensed materials in logging operations and that such surveys will be recorded.

4. Please submit a copy of the form you intend to utilize for recording job site surveys (if different from that previously submitted) and a copy of the form you will maintain as your utilization log. As we described in our October 3 letter, your utilization log should identify the date of use, place of use, sealed source utilized, user to whom assigned, any helpers, and the date the source is returned to storage.

Our review of your application will continue upon receipt of the above information. Please reply in duplicate within 30 days and reference Mail Control No. 17992.

Sincerely,

Original Signed By
