Attn: Material Radiation Protection Section

Re: NRC License No. 15-21331-01 - Exp. 2/28/85
Renewal Application Pending

Gentlemen:

Please amend Condition 10 of the above captioned by-product material license to delete our facility at 715 West Main, Henryetta, Oklahoma, and replace it with our new facility at Fourth and Taylor, Henryetta, Oklahoma. The attached sketch of the facility will be used as our facility/bunker survey. Also attached is a survey of the vacated premises.

Since we have already relocated to the new facility, we are considering it a field site location, and will keep the source(s) on the logging vehicle(s) at this location pending receipt of the amendment authorizing use of the facility for storage.

Please be advised that under authority of the license, I have designated Jimmy D. Arias to assist me by taking the responsibility of the day-to-day radiation safety and compliance for the Henryetta station. A copy of his resume and certificate of radiation safety training are attached.

Enclosed is our check in the amount of \$170.00 to cover the fee for this amendment (Well Logging - Category 5). Your prompt attention to this request will be greatly appreciated.

Sincerely,

S.W. Hoffman

S. W. (Bill) Hoffman

MAY 1985

JIMMY D. ARIAS

Date of Birth: June 12, 1953

Social Security No: 515-60-1603

Mr. Arias worked for Gearhart from 1977 to 1983 where he received on-the-job training as a well logger and handled all types of sources used in oil and gas well logging. In May 1978 he completed Gulf Nuclear, Inc.'s radiation safety course for well loggers. Mr. Arias has been employed by Great Guns, Inc. for the past two years and has demonstrated that he is capable of overseeing the radiation safety and compliance program for the Henryetta facility.
