A meeting was held at NRC Headquarters in Rockville, Maryland on Wednesday, September 8, 1993 to discuss plans for reviewing the findings of an ongoing OI investigation related to the March 20, 1993 emergency diesel generator failures. The purpose of the review is to develop a proposal on what enforcement actions may be appropriate based on those findings. The following individuals attended the meeting:

Larry,

- Here is what you ask for.
- My oral remarks are different and were spoken from notes. If you get hearing transcripts I would like mine & Dahlbergs.
- In my oral remarks I spoke positively of NRC OI's actions but not of staff's.
- I don't mean to bug you but I still need that "white paper" final rev. & the copy given to NRC.
