Division of Fuel Cycle and Material Safety
Office of Nuclear Material Safety and Safeguards
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555
ATTN: Sandra McDonald

REF: Control #13648

SUBJ: Increase in amount of Isotope on License #46-19584-01

1. We are using I^{125} (Iodine) under a high efficiency hood.
2. A urinalysis will be done on users within 24-48 hours after exposure to the Iodine.
3. A thyroid uptake will be done on users only if the urinalysis is positive.
