Docket No. 50-213

Connecticut Yankee Atomic Power Company
ATTN: Mr. J. F. Opeka
Senior Vice President - Nuclear
Engineering and Operations Group
P. O. Box 270
Hartford, Connecticut 06101

Gentlemen:

Subject: Requalification Training Meeting Report 50-213/85-10

This refers to our March 25, 1985 meeting regarding requalification training in response to our concerns resulting from the operator licensing requalification program evaluations which we conducted in August and November 1984. The purpose of the meeting was to discuss your plans for short-term upgrading to support operator license renewals planned for calendar year 1985, your long-term program, and your program for assuring ongoing requalification program effectiveness.

Based on telephone conversations between my operator licensing staff and your Dr. Sears and Mr. Test you are preparing a letter to us which: (1) documents those individuals that will be exempted from the theory upgrade portion of the program, (2) provides the details of an independent third party evaluation of your program, and (3) the names of individuals who will not complete the short-term program with the appropriate justification for license renewal prior to completion of the short-term program.

As I indicated during this meeting, based on our requalification audit, we are not in a position to renew licenses until remedial measures have been instituted.

Sincerely,

Original Signed By:

Richard W. Starostecki, Director
Division of Reactor Projects
