Control #16404, Renewal of License #34-18196-01

Dear Mike,

Enclosed you will find our renewal application for a Type B Broad Scope Byproduct Materials License. I hope I have sufficiently addressed all of those items missing from our first renewal application, as well as those additional items necessary for the broad scope license.

We desire to delay relicensing of our present incinerator due to anticipated future changes in its operating parameters. These changes are deemed necessary by the manufacturer in order to safely and completely incinerate volatile organic solvents such as those present in scintillation fluids. At this time, we only request to continue incinerating animal carcasses containing 3-H and 14-C with activities less than 0.05 uCi/gm.

Sincerely,

Michael D. Powell

Michael D. Powell
