License Nos. DPR-38, -47, & -55

The following violations were identified during an inspection conducted on September 10-14, 1984. The Severity Levels were assigned in accordance with the NRC Enforcement Policy (10 CFR Part 2, Appendix C).

1. NRC Order 7590-01 July 10, 1981 to Oconee, Order Confirming Licensee Commitments On Post TMI Related Issues, requires certain TMI items to be implemented. This is a Severity Level IV violation (Supplement I) applicable to units 1, 2, and 3.

2. Oconee Technical Specification Figure 6.1-1, Station Organization Chart, requires the Shift Technical Advisor (STA) to report to the Operating Engineer and to advise the Shift Supervisor.

Contrary to the above, as of September 14, 1984, Oconee Station Directive 3.1.36, revision dated January 18, 1984, requires the SRO/STA to report to the Shift Supervisor on items pertinent to normal operations and to perform the normal line function of SRO in charge of the control room.
