October 28, 1996

James Bradner
Radiation Safety Officer
Detroit Lime Company
125 S. Dix Ave.
Detroit, MI 48217

Dear Mr. Bradner:

This refers to the inspection conducted on September 19, 1996. In addition, we reviewed the submitted leak test results of your Kay-Ray level measurement gauge in your letter dated October 3, 1996. The purpose of the inspection was to determine whether activities authorized by your license were conducted safely and in accordance with NRC requirements. At the conclusion of the inspection, the findings were discussed with you.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, independent measurements and observation of activities in progress.

No violations of NRC requirements were noted. Further, no safety concerns regarding the implementation of your radiation safety program were identified. It is not necessary that you acknowledge receipt of this letter.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room (PDR).

I wish to extend our appreciation for your cooperation during the inspection.

Sincerely,

Original Signed by Roy J. Caniano

Cynthia D. Pederson, Director
Division of Nuclear Materials Safety
