

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

DEC 14 1984

MEMORANDUM FOR: Thomas M. Novak, Assistant Director  
for Licensing  
Division of Licensing

FROM: William V. Johnston, Assistant Director  
Materials, Chemical & Environmental Technology  
Division of Engineering

SUBJECT: FIRE PROTECTION SUPPLEMENTAL SAFETY EVALUATION REPORT -  
PALO VERDE NUCLEAR GENERATING STATION, UNITS 1, 2 & 3

Plant Name: Palo Verde Nuclear Generating Station, Units 1, 2 and 3  
Docket Nos.: 50-528/529/530  
Licensing Stage: OL  
Responsible Branch & Project Manager: LB #3; E. Licitra  
Chemical Engineering Reviewer: D. J. Kubicki  
Requested Completion Date: ASAP  
Review Status: Complete

In our memorandum of October 15, 1984, in which we transmitted our input to Supplemental Safety Evaluation Report (SSER) No. 7, we stated that our review of the applicant's fire protection program was complete.

However, by letters dated September 26; October 5, 9, 16 (two letters); November 13, 21, 28; December 3, 5, 7, 10 (two letters), 13 (two letters) and 17, 1984, the applicant provided additional information.

Attached is our evaluation of this information. Because of the extensive nature of the information submitted since our October 15, 1984 memo, we have completely revised our SSER input. Included in our SSER is an evaluation of the applicant's spurious actuation analysis, provided by the Auxiliary Systems Branch via a memorandum dated December 18, 1984.

Also attached is the proposed license condition for the fire protection program and our SALP input.
