SUBJECT: NRC INSPECTION REPORT 50-155/96006(DRP)

Dear Mr. Donnelly:

On September 6, 1996, the NRC completed an inspection at your Big Rock Point Nuclear Plant. The enclosed report presents the results of that inspection.

During this 6-week inspection period operations, maintenance, and engineering activities were generally performed satisfactorily. The inspectors identified a concern with an operational assessment that was not fully documented for the back-up core spray system.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter, its enclosures, and your response will be placed in the NRC Public Document Room (PDR).

Sincerely,

/s/John A. Grobe for

James L. Caldwell, Acting Director  
Division of Reactor Projects
