RE: Application for Material License Renewal  
License Number 48-00479-02

Applicant	April 11, 1985
Check No.	030494150
Amount/Fee Category	\$30.00
Time of Fee	30 pen
Date Check Rec'd	4/15/85
Received By	G

Dear Sir:

General description of activities: Gilbert Paper has 4 radionuclide sources, all of which are used for basis weight measurement on paper web handling equipment. Two of the sources are in Accuray equipment and are held under a general license. Our specific license includes two sources in Laboratory For Electronics equipment.

Deletions since last amendment:

Three sources were submitted for disposal (all Krypton 85)

U.S. Radium	SN 9501	30 mc
U.S. Radium	SN 9497	60
LFE	SN 6025	500

Mike Marsh, Chief Engineer, should be deleted from the list of supervisory personnel.

Additions since last amendment:

List of supervisors, add:

Richard J. Slater, Chief Engineer

Other individuals who supervise the use of licensed material, Hillard Strebe and Gene Bruss, have had instructions in the use and operation of the devices from LFE at the time of original installation. As the date and nature of training is not documented, we have scheduled training for the 3 persons on the list. The training will be give by LFE Corp. on or about August 15, 1985.

There are no supporting documents referenced by our current license. The current license and the present amendments represent our intended use of the sources. We will continue to operate in accordance with the amended license and applicable NRC regulations.
