

DCD

October 30, 1996

Stephen J. Haddock  
Radiation Safety Officer  
Advanced Medical Systems, Inc.  
1020 London Road  
Cleveland, OH 44110

Dear Mr. Haddock:

This refers to the inspection conducted on September 9-10, 1996 at the London Road facility. The purpose of the inspection was to determine whether activities authorized by the license were conducted safely and in accordance with NRC requirements. At the conclusion of the inspection, the findings were discussed with you and members of your staff.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, independent measurements and observation of activities in progress.

In addition to the above areas, the inspector examined actions described in your letter dated May 24, 1996, regarding apparent violations found during our April 29-30, 1996 inspection. We have no further questions regarding these matters.

No violations of NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practices," a copy of this letter, will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

Original Signed by Roy J. Caniano  
Cynthia D. Pederson, Director  
Division of Nuclear Material Safety
