NUCLEAR RADIATION CENTER

May 30, 1985

54-27

Director, Office of Nuclear Reactor Regulation  
U.S. Atomic Energy Commission  
Washington, D.C. 20555

Gentlemen:

In accordance with the requirements of Section 6.10(3)(c) of the Technical Specification for facility license R-76, we hereby inform the commission of the following change in the facility organization.

Mr. Davis R. Rosenberg, who was the Reactor Technician, resigned his position on the reactor operating staff effective May 17, 1985 to take a position at the Puget Sound Naval Shipyard. Due to the fact that a hiring freeze had been placed upon all Washington State agencies by the Governor of the State, no replacement could be sought prior to Mr. Rosenberg's departure. The freeze has now been lifted, and we are seeking a qualified replacement for Mr. Rosenberg.

During the summer of 1985, the only licensed individuals at the facility will be the Reactor Supervisor (SRO) Jerry Neidiger and myself (SRO). The facility will only be operated about 3 days per week and no licensed individuals will be present, and the facility locked about one day a week. In order to provide for vacation periods, the facility will be closed on two separate weeks during the summer. We would greatly appreciate that any inspections be coordinated with our protracted operating schedule.

Sincerely,

*W.E. Wilson*

W.E. Wilson  
Associate Director
