RE: APPLICATION FOR AMMENDMENT
LICENSE NO. 34-16013-01
CONTROL NO. 75446

Dear Ms. Matson:

After discussing the design of the Peco Controls "Pro-Max" unit presently called a "Pro-Max 2000," it has been determined the unit is a Pro-Max 1000 with adjustable mounts. Peco Controls Corp. is attempting to rectify the mis-naming of this unit. As we get the proper documentation of this change, we will forward copies to you for your inspection.

We hope this clarifies the situation and eliminates the need for the Custom Made Sealed Sources and Devices applications. If you have any other questions, please let us know.

Sincerely,

L. A. Mugler
