Research Professor  
University of Pittsburgh  
Graduate School of Public Health  
130 DeSoto Street  
Pittsburgh, Pennsylvania 15261

MAR 14 1978

Dear Dr. Mancuso:

The Office of Standards Development of the Nuclear Regulatory Commission is issuing a Request for Proposal (RFP) to individuals with expertise in cancer etiology, for the purpose of obtaining multiple independent analyses of the Hanford Mortality Data.

Those data tapes which are currently available from Pacific Northwest Laboratories and the National Cancer Institute will be obtained for analysis. However, it is our understanding that you have obtained additional data which neither of the above organizations have in their possession.

In order that it be possible for the most up-to-date analyses to be performed, your additional data should be provided to those who respond to the RFP. Therefore, we ask that you make available the additional data to either the NRC or to those individuals who will perform the work.

Thank you in advance for your consideration in this matter and if there is anything we can do to help you please let us know.

Sincerely,

8507220523 850524
