Subject: Proposed Technical Specification Change (License Amendment) - Safety Limit - Minimum Critical Power Ratio (MCPR)

On September 5, 1996 Detroit Edison proposed a License Amendment (Reference 2) to change the Minimum Critical Power Ratio (MCPR) Safety Limits in Technical Specification 2.1.2. The proposed changes result from a cycle specific calculation performed for Fermi 2 Operating Cycle 6, expected to commence in November of 1996. Based on this, Detroit Edison concurs with the addition of a footnote indicating that the MCPR Safety Limit values of Specification 2.1.2 are only applicable for Cycle 6 operation. This was discussed between A. Kugler of NRC and R. Newkirk of Detroit Edison on October 31, 1996.
