DUKE POWER

October 28, 1996

U. S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, DC 20555

Subject: McGuire Nuclear Station, Units 1 and 2,
Docket Nos. 50-369 and 370
Supplement to Replacement SG Proposed TS Amendment
(TACs M90590 and M90591)

By letter dated September 23, 1996, Duke Power Company provided revised offsite dose results for the postulated steam generator tube rupture event. A previous March 15, 1996 submittal had provided revised offsite dose results for the locked rotor, rod withdrawal and rod ejection accidents.

In an October 10, 1996 conference call with the NRC Staff, Duke was requested to provide the supporting calculations for the above dose analyses. A calculation package for each is attached.

Please contact R. O. Sharpe at (704) 382-0956 if you have any questions.

Very truly yours,

M. S. Tuckman
