Subject: Teleconference with Nextra Energy - Duane Arnold Physical Security Plan LIC-109 review status

Mike,

I tried reaching you via phone but could not connect. The NSIR staff has performed the LIC-109 acceptance review of the Duane Arnold Physical Security Plan, submitted on February 13, 2020, and would like to discuss the status of the review. The NRC staff has categorized it as Non-acceptance with Opportunity to supplement in 13 days in accordance with the procedure. I will be transmitting you the list of insufficiencies via secure method BOX, since this information is Official Use Only. I will be transmitting it to you only, and then you can share it internally with your folks.

The teleconference is tentatively set for Thursday, March 26, 2020, 1:00 – 2:00 pm EDT.

Once you folks accept the invite which I will send shortly, we will confirm the teleconference. I am planning to set it through Headquarters Operations Officer (HOO) since we all are working remotely. This will allow set up of two bridge lines.

In accordance with LIC-109, Section 4.1, the purpose of the call is to identify the uncertainties to the licensee and discuss the appropriate course of action, and establish the specific date the information will be submitted. Just a reminder that there should not be any technical discussion on the insufficient information, specifically since this is all Safeguards Information.

If the above time is not suitable, please provide me alternate options. Thanks

Mac Chawla
