June 18, 1985

United States Nuclear Regulatory Commission  
Region III  
799 Roosevelt Rd.  
Glen Ellyn, IL 60137

Gentlemen:

We wish to ammend our License Number 14-17683-01 issued to the Ames Municipal Electric System, Ames, Iowa.

The ammendment is desired in order to permit the use of Cesium 137 sealed sources for possession and use in Texas Nuclear devices which have been evaluated and approved for licensing purposes and authorized for distribution under a license issued by the Nuclear Regulatory Commission or an agreement state. No single source to exceed 200 millicurries.

It is intended that the above language be added to our license and not replace Items 8 and 9 which itemize products from manufactures other than by Texas Nuclear. The purpose of the ammendment is to permit us to purchase, install, relocate or remove all models of Texas Nuclear products which use Cesium 137 sealed sources less than 200 millicurries.

All other conditions of our license are to remain the same.

I believe we are exempt from licensing fees since we are part of the City of Ames.
