Re: NRC License Amendment Request
Control No. 78951

Dear Ms. Holt:

As you requested on the telephone, I have reviewed the letters dated September 22, 1983 and October 6, 1983.

We are going to continue with the air monitoring program. However, we may send the filters to R. M. Wester and Associates for analysis. They are a local facility which will expedite the results. We also use them as consultants, when needed.

The urine and fecal testing program will be eliminated. We have extensive results showing there is little or no exposure with the samples we handle. In fact, we have had no exposure since we started our analysis of these samples. Therefore, having these tests run is not economical. We are, however, going to continue with our personnel monitoring badges.

I would like to point out that as I read the license, it could be interpreted that we analyzed radioactive samples for DuPont only. While DuPont is our main client (95 percent of radioactive workload), we have a few other small clients with the same type of samples. DuPont was used as an example to show the type of samples expected and how we handle them.

I hope this completes the required responses. Thank you for your time and patience. If you have any questions, please call.

Sincerely,

T. Will Solomon
