MEMORANDUM OF UNDERSTANDING

As part of my participation as an observer of the NRC's oversight of Northeast Nuclear Energy Company's (NNECOs) conduct of the Independent Corrective Action Verification Program (ICAVP) at Millstone Unit 3, I agree to the following protocols:

- I will make advance arrangements with the licensee for site access training and badging (subject to fitness-for-duty requirements), prior to the actual on-site period.
- My communication with the licensee will be through the NRC team manager, Eugene V. Imbro or team leader, Loren Plisco.
- When informed of an unannounced assessment activity, I will not release information concerning its time and purpose.
- I will remain in the company of NRC personnel throughout the course of the assessment.
- I understand that my participation may be terminated by the NRC if my conduct interferes with a fair and orderly inspection.
- I will not be provided with proprietary or safeguards information. I will not remove any material from the site without NRC or licensee approval.
- I understand that, in accompanying NRC personnel, I do so at my own risk. NRC will not be responsible for injuries or exposures to harmful substances which may occur during the assessment and will assume no liability for any incidents associated with my accompaniment.
- I agree to adhere to the same standards of conduct as NRC personnel during this assessment.
- If I become aware of any apparent non-conformance with safety or regulatory requirements during the assessment or have any comments on the conduct of the NRC oversight or the independence of the licensee's ICAVP effort, I will make those observations promptly known to the NRC team manager or team leader. Likewise, when my overall conclusions or views are substantially different from those of NRC team members, I will advise the ICAVP team manager and forward those views, in writing, to Mr. R. P. Zimmerman. This will allow NRC to take any necessary regulatory actions.
- Under no circumstances will Nuclear Energy Advisory Council communications regarding the results of these inspections be released to the public or the licensee before they are reviewed by the NRC and the

ALTERNATE

inspection report is issued. Nuclear Energy Advisory Council communications may be made publicly available, similar to NRC inspection reports, after they have been transmitted to and reviewed by NRC.
