Fermi 2 Power Plant
NRC Docket No. 50-341
NRC License No. NPF-43

Subject: Notification of Intention Regarding
NRC Inspection Report 05000341/2020403; EA-19-138

References: 1) Fermi Power Plant, Unit 2 – Security Baseline Inspection Report
05000341/2020403; NRC Investigation Report No. 3-2019-004 and Apparent
Violations (ML20120A443)

In Reference 1, the Nuclear Regulatory Commission (NRC) documented three apparent violations against DTE Electric Company (DTE) that it is considering for escalated enforcement action in accordance with the NRC Enforcement Policy. Also in Reference 1, the NRC concluded that the apparent violations have very low security significance (green). The NRC letter provided DTE with the opportunity to (1) request a Pre-Enforcement Conference (PEC), (2) participate in Alternative Dispute Resolution (ADR) or (3) to submit a written response to the NRC regarding the apparent violations. DTE appreciates the opportunity to respond to the NRC on this issue. Mr. Steven Orth, Division of Reactor Safety, was verbally notified on May 7, 2020 of DTE's intent to submit a written response on this matter and not to request a PEC or participate in ADR. This letter further documents that DTE intends to submit our position on the proposed findings and apparent violations to the NRC in writing, as allowed by the NRC in Reference 1. As the letter was received by DTE on April 29, 2020, DTE will respond to the NRC's apparent violations within 30 days of receipt, which is by May 29, 2020.

No new commitments are being made in this submittal.

Should you have any questions or require additional information, please contact
Ms. Margaret Offerle, Manager – Nuclear Licensing, at (734) 586-5076.

Sincerely,

Peter Dietrich
Senior Vice President and Chief Nuclear Officer
