Subject: James A. FitzPatrick Nuclear Power Plant, Docket No. 50-
Indian Point 3 Nuclear Power Plant, Docket No. 56-286
Quality Assurance
Requirements Contained in 10CFR Part 71 for Shipping Pa

Dear Sirs:

Pursuant to the requirements of 10CFR 71.51(d), the Power Authority of the State of New York will apply the applicable portions of its Nuclear Regulatory Commission approved Operations Quality Assurance Programs to the applicable activities set forth in 10CFR 71, "Packaging of Radioactive Material for Transport and Transportation of Radioactive Materials Under Certain Conditions". The Authority's Quality Assurance Programs will be modified accordingly.

Carriers of radioactive materials are required to submit their quality assurance program to the Commission for review and approval. By letter of 11/15/78, the Commission advised that it will not approve quality assurance programs of carriers under contract to the Commission. The Commission approved the quality assurance program of carriers under contract with the Authority. The Authority is authorized to verify, implement, and maintain the quality assurance program of the Authority.

Very truly yours, 11593
