

"OFFICIAL RECORD COPY"

JUL 02 1985

Frank S. Lisella, Ph.D.  
Director, Office of Biosafety  
Centers for Disease Control  
DHHS, PHS  
1600 Clifton Road, N.E.  
Atlanta, GA 30333

Gentlemen:

SUBJECT: REQUEST FOR ADDITIONAL INFORMATION CONCERNING A MATERIAL LICENSE  
APPLICATION (REFERENCE: 18444, 030-04001)

This refers to your letter dated May 28, 1985, which was in response to our letter dated May 6, 1985. As discussed on the telephone with Paul Simpson on June 8, 1985, the renewal application should be reflective of the current program and based on procedures and documents currently being used. It appears that the "draft Radiation Safety Manual" which was originally submitted with your application is not the same as the draft that you are currently working on. When your license is renewed, it will be tied to these documents as a basis for issuing your license, and you will be expected to be following these procedures unless your license is amended. Mr. Simpson seemed to think that the Radiation Safety Manual and animal procedures may be finalized at a July 11th Radiation Safety Committee meeting, and that the survey procedures may be finalized at a meeting on July 23rd. In order to have the necessary documents and procedures and to make your license reflective of the program, we should wait to renew your license until we are able to review these new procedures and documents.

If you should have any questions, do not hesitate to contact me at 221-2675.

Sincerely,

Carol A. Connell  
Radiation Specialist  
Nuclear Materials Safety Section
