Docket: 50-298

Nebraska Public Power District
ATTN: J. M. Pilant, Manager, Technical
Staff-Nuclear Power Group
P. O. Box 499
Columbus, Nebraska 68601

Subject: Licensed Operator Requalification Examinations

Gentlemen:

We have reviewed your letter to Mr. R. D. Martin, CNSS 853146, dated May 30, 1985, concerning the delay of your requalification examinations until August and September of this year.

We understand that this is only a one time delay, and that your requalifications examinations will be given at their regular scheduled time in 1986. As your letter states, the NRC will conduct requalification examinations during August of 1985. The facility has been notified of this date for examinations. This delay should have no effect on the next requalification cycle, and all licensed operators and senior operators should complete that cycle by May 31, 1986.

Should you have any questions concerning this matter, please contact Mr. Ralph A. Cooley, Chief, Operator Licensing Section at 217/860-8147.

Sincerely,

Original Signed By
E. H. Johnson
