Joseph Del Medico  
Licensing Management Branch  
Division of Fuel Cycle and Material Safety  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Del Medico:

Enclosed is our application for a license to operate a Nuclear Pharmacy in the St. Louis area. At this time we have not received our pharmacy permit, but as soon as the permit is issued we will forward it to your office.

Attachment #10, request for authorization for collection of waste, is enclosed with this application. We presently are authorized to collect waste at our other three facilities. I have upgraded the training program for drivers which is included in Attachment #9.

We will ask for authorization for 133-Xenon through an amendment letter when we have completed the installation of the fume hood and obtain our measured ventilation data.

In putting together this application I have attempted to make sure that all of the questions which were asked relative to our Pittsburgh application have been answered correctly in this application. I have also incorporated information for authorization for redistribution of in-vitro kits, and material for individuals working under a general license. The information which I have supplied concerning this is based on letters received by us from you and Mrs. Vacca relative to amendment letters which we have submitted in the past for our other pharmacies.

I apologize for submitting this application prior to receiving your draft guide for radiopharmacies, but I will be out of town for the next two weeks and we wish to get things going as soon as possible.

Your consideration in this matter is appreciated.

Sincerely,

*Frank M. Comer*
