Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: LaSalle County Station Unit 1
Proposed Amendments to Technical
Specification for Facility
Operating License NPF-11
Waiver of 18-month Surveillance
Interval
NRC Docket Nos. 50-373

Dear Mr. Denton:

Pursuant to 10 CFR 50.59, Commonwealth Edison proposes to amend Appendix A, Technical Specification, to Facility Operating License NPF-11. These changes are being submitted for your staff's review and approval.

Attachment A provides background and discussion. The proposed change is enclosed in Attachment B. The attached change has received both On-Site and Off-Site review and approval. We have reviewed this amendment request and find that no significant hazards consideration exists. Our review is documented in Attachment C.

Commonwealth Edison is notifying the State of Illinois of our request for this amendment by transmitting a copy of this letter and its attachments to the designated State Official.

This request for a waiver of selected 18-month surveillances for a maximum of 36 days is necessary to more adequately utilize the core. This one-time waiver would allow CECO to begin the Unit 1 first refuel outage no later than October 27, 1985.

In accordance with the requirements of 10 CFR 50.170, a fee remittance in the amount of \$150.00 is enclosed.
