Annual Update of System Descriptions and

Pursuant to your letter dated February 4, 1982, GPU Nuclear has performed the annual review of the Once Through Steam Generator Layup Recirculation System Technical Evaluation Report and has determined that no update is required at this time.

Additionally, GPU Nuclear is deleting the System Description for the Standby Pressure Control System and the Mini Decay Heat Removal System. These systems are no longer required by the TMI-2 Technical Specifications as a result of the NRC's Amendment of Order dated August 8, 1985.

Sincerely,
