MEMORANDUM FOR: E. L. Jordan, Director
Division of Engineering and
Quality Assurance, IE

FROM: G. C. Lainas, Assistant Director
for Operating Reactors
Division of Licensing

SUBJECT: SUPPLEMENTAL SAFETY EVALUATION REPORT (SSER) FOR THE
ARKANSAS NUCLEAR ONE, UNIT 2 PLANT RE: ENGINEERED
SAFETY FEATURES RESET CONTROLS (I&E BULLETIN 80-06)

Arkansas Power and Light Company's re-evaluation of their response to I&E Bulletin 80-06 for ANO-2, (letter dated April 16, 1982 and corrected by letter dated June 16, 1982) has been reviewed. The review is contained in the enclosed Supplemental Safety Evaluation Report (SSER) which concludes that AP&L has satisfied the requirements and concerns of I&E Bulletin 80-06, subject to completion of commitments to perform the modifications and testing identified in the April 16, 1982 response letter.

Our previous SER on this matter, dated June 3, 1981, concluded that the licensee complied with IEB 80-06. However subsequent I&E inspection found that certain licensee activities were not conducted in full compliance with NRC requirements and other activities appeared to deviate from written commitments to the Commission. Refer to Region IV letters to AP&L dated April 9 and April 16, 1982 for details.

Please contact us if you have any questions concerning this matter.
