Mercy Medical Center  
Department of Radiology  
ATTN: Mr. Paul Halnerson  
Vice President of  
Professional Services  
4050 Coon Rapids Blvd.  
Coon Rapids, MN 55433

Gentlemen:

Enclosed is Amendment No. 05 to your NRC License No. 22-17307-01 in accordance with your request.

Please note that Drs. Gretch and Hendrickson were not added as authorized users to your license. They did not specify the actual number of cases which they participated in (on NRC-313M Supplement B) and we were unable to verify their board certification with Special Competence in Nuclear Medicine. Their board certification as listed in the Directory of Medical Specialists is in Radiology only. If you wish to pursue adding Drs. Gretsch and Hendrickson to your license, you may:

1. Submit evidence of board certification with special competence in nuclear medicine, or
2. Submit the NRC license number or a copy of the Agreement State license on which they are currently listed as authorized users, or
3. Submit signed updated Supplements A and B describing their training and clinical experience received within the past five years.

Information submitted in response to this letter should state that it is additional information and not a new amendment request.

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.

JUN 28 1985

3. Use radioactive material only for the purpose(s) indicated in your license.
4. Notify NRC in writing of any change in mailing address.
5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (312) 790-5625.

Sincerely,

Original Signed By  
William J. Adam, Ph.D.  
Materials Licensing Section
