July 19, 1985

Director,
Nuclear Reactor Regulation
US Nuclear Regulatory Commission
Washington, DC 20555

DOCKET 50-155 - LICENSE DPR-6 - BIG ROCK POINT PLANT -
REVISED TECHNICAL SPECIFICATION CHANGE REQUEST -
CONTAINMENT PRESSURE AND WATER LEVEL MONITORS

Attached are three (3) original and thirty-seven (37) conformed copies of a revised request for change to the Big Rock Point Technical Specifications. These requested changes provide the technical specifications for the Containment Pressure Monitor and the Containment Water Level Monitor as committed to by Consumers Power Company in our December 19, 1980 response to NUREG-0737, item II.F.1, attachments 4 and 5, as updated by our July 9, 1981 and February 5, 1982 letters. This change request supersedes our March 10, 1982 submittal. This request also completes our commitment and associated responses to these specific NUREG-0737 items.

The revisions to this change request include surveillance requirements for these monitors as requested by the NRC.

A check in the amount of \$4,000 was attached to our March 10, 1982 submittal, therefore no fee is remitted with this revised change request.

David J VandeWalle
Director, Nuclear Licensing

CC Administrator, Region III, USNRC
NRC Resident Inspector - Big Rock Point
