Dear Mr. Youngblood:

Millstone Nuclear Power Station, Unit No. 3
Supplement 1 to NUREG-0737
Control Room Design Review
Addendum No. 1 to the Summary Report

In Reference (1), Northeast Nuclear Energy Company (NNECO) indicated that the Control Room Design Review (CRDR) Addendum Report was scheduled to be submitted on or about September 3, 1985. Accordingly, we hereby submit Addendum No. 1 to the CRDR Summary Report. This Addendum Report addresses the six (6) items identified in the CRDR Summary Report (which was submitted in Reference (2)) as addendum items, the four (4) items contained in Section 18.1 of Reference (3), and other items delineated in Appendix I of Reference (3).

We trust that this submittal provides sufficient information to allow the NRC Staff to determine whether a pre-implementation audit is necessary. If deemed necessary by the NRC Staff, we are prepared to support a pre-implementation audit at any time during September, 1985.

As indicated in the attached Addendum Report, eleven (11) checklist items pertaining to the environmental, communications, and computer surveys are not yet completed, but are scheduled to be completed by the end of October, 1985. Since pertinent design documents have already been reviewed by the CRDR core team, we do not expect that any safety significant Human Engineering

Discrepancies (HEDs) will be identified. All HEDs identified will be evaluated in accordance with the CRDR methodology and summarized in a subsequent addendum report, which will be submitted prior to fuel load.

We do not believe that receipt of our next addendum report is necessary to allow the NRC Staff to remove the CRDR as an outstanding item in Reference (3). We believe sufficient information exists in this submittal to allow that to occur.

Most of the information contained in Enclosures 1 and 2 in Attachment No. 1 is of the type which the Westinghouse Electric Corporation customarily maintains in confidence and withholds from public disclosure. This information has been handled and classified proprietary by the Westinghouse Electric Corporation, and we hereby make application for withholding Enclosures 1 and 2 in Attachment No. 1 from public disclosure pursuant to 10CFR2.790.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY
