

GENERAL ELECTRIC

WILMINGTON MANUFACTURING DEPARTMENT
GENERAL ELECTRIC COMPANY • P.O. BOX 780 • WILMINGTON, NORTH CAROLINA 28402

April 22, 1985

Mr. J. Philip Stohr, Director
Division of Radiation Safety & Safeguards
U. S. Nuclear Regulatory Commission, RII
P. O. Box 2203
Atlanta, Georgia 30301

Dear Mr. Stohr:

References: (1) NRC License SNM-1097, Docket 70-1113
(2) NRC Inspection Report 70-1113/85-01
dated 2/21/85, received 2/26/85
(3) Letter, CM Vaughan to JP Stohr, 3/22/85

Attached is a supplement to the General Electric Company response to the report of the inspection conducted at our licensed fuel fabrication plant by Mr. D. W. Jones of your office on January 14-17, 1985.

The attachment to this letter deals with a description and clarification of the phrase "provides a mechanism" for the Manager of L&NMM to review and approve procedures, and also addresses the subject of delegation of safeguards-related activities which is independent of the Notice of Violation but surfaced during discussions related to our response.

We welcome further discussion with your staff on these items as necessary.

Pursuant to 10 CFR 2.790(d), General Electric Company requests that the attachment to this letter be withheld from public disclosure since this attachment identifies details of General Electric's control and accounting procedures for safeguarding licensed special nuclear material.

Very truly yours,

GENERAL ELECTRIC COMPANY

Charles M. Vaughan
