SUBJECT: WASTE RECYCLER LIST

Dear Ms. Williams:

In a telephone call to me, you requested a list of NRC-licensed "waste recyclers." In response to your request, enclosed is a copy of active NRC "waste disposal" licensees (Enclosure 1). To help you determine what general activities each licensee listed in Enclosure 1 is categorized as, please refer to the Material License Program Codes List in (Enclosure 2). Finally, please find enclosed a list of radioactive waste broker and processor services (Enclosure 3).

I hope this information responds to your request. Please feel free to call me if you have any additional questions.

Sincerely,

NSSI can deal with U & Th salts of reagent grade and with H³ compounds. SEG offers volume reduction and stabilization in metal. Unwanted Pu238 or Am241, Be or B sources should be registered with Los Alamos Lab. Among firms that transport radioactive materials, those mentioned by the waste brokers are: Hittman Transport, 800/449-8626; J. B. Hunt, 800/368-8539; Kindrick Transport, 615/882-0457; Tr. States Motor Transit, 800/234-8768; U.S. Ecology (TransTec); Chem-Nuclear; and RSO Inc.

1 A firm is listed here if it was identified by a radiation control program, provides radioassay of diverse low specific activity materials, has Q.A. & Q.C. programs, and will accept work from others; endorsement is not implied.

2 The radiation control program that reported using this firm or referring others to the firm for radioassay; many state programs certify labs for drinking water or Env. sample radioassay, but there is no national certification program, nor does the CRCPD have a program to evaluate or endorse laboratories for the services listed here.

3 Quality control/assurance programs for radioassay: the NIST-USCEA Traceability Pgm.; the EPA Las Vegas Lab for water, milk and air filter cross-check and intercomparison; DOE Q.A. Pgm. for its contractors.

4 The firm also performs the toxic characteristic leaching procedure required by EPA for wastes to be disposed of, e.g. at Envirocare or Richland.

5 The firm will provide packages for samples and instructions on packaging.

6 Response time is the typical value from receipt of sample to report of analysis by the firm; most firms will expedite sample analysis for an additional fee.

As with our table of waste brokers, t. No's are definite, Yes means maybe, and both the availability of a service and the prices change continually.

Please identify additional firms, or report corrections of the information, to Terry Devine by telefax, 502/227-7862

Radioactive Materials Sought for Recycling

December 1993

As one of its services, the Conference of Radiation Control Program Directors Inc. maintains a list of firms that recycle radioactive materials from sources having useful quantities of radioactivity. The following needs have been identified, largely through the efforts of radioactive waste brokers.

Complementary to this list, the CRCPD compiles notes on unwanted sources or devices that contain either substantial amounts or unusual types of radionuclides. Increasingly often a new owner is obtained for one of these, primarily through one of the radioactive waste brokers that provide this service. In cooperation with DOE initiatives, the CRCPD is particularly interested in identifying unwanted Pu-238, Pu-239 or Am-241.

For additions or corrections to these lists, please telephone Terry Devine, 502/227-4543.
