NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

FOR

FEB 15 1985

Docket Nos. 50-445/50-446

MEMORANDUM FOR: File

FROM: D. C. Jeng, Comanche Peak TRT

SUBJECT: TECHNICAL DISCUSSION WITH H. LEVINE OF TUGCO RESPONSE TEAM

On February 11, 1985 (10:00 a.m.), D. Jeng and T. Langowski of the TRT met with H. Levine of TUEC at the NRC, Rockville, Maryland office to discuss and exchange technical information related to TUGCO's civil/structural action items:

1. H. Levine briefly reported the highlights of his presentation to an NRC senior panel on Contention V which took place at the site during the week of February 4, 1985. He also left a copy of the slides used in the presentation for TRT staff information.
2. Mr. Levine discussed key activities and approaches that are being examined for adoption in resolving the action item pertaining to the control room ceiling adequacy evaluation. He noted that an analytical effort with reasonable scope and detail would be implemented as a portion of the total effort in resolving the control room issue.
3. He also indicated that a public meeting between the TRT staff and TUGCO representatives to discuss the specific TUGCO plans for resolving the civil/structural action items would greatly benefit both parties in completing the action items.
4. D. Jeng of the TRT requested H. Levine to arrange a conference call between the TRT staff and pertinent TUGCO personnel to collect information needed for addressing recent concerns raised by CASE during the November 7, 1984 meeting held in Arlington, Texas, between CASE and the TRT. The conference call will be held to get information related to drilling of holes in channel sections of cable tray supports and alleged high stresses in a steel plate used as one of the supports for the containment spray piping system. Other issues raised by CASE during the above referenced meeting (e.g., use of 1.5 amplification factor for seismic loads determined via equivalent static analysis) will also be discussed to clarify the characterization of the allegations.

The conference call is tentatively set at 9:00 a.m. on February 12, 1985.

5. Mr. L. C. Shao joined the discussion between D. Jeng and H. Levine briefly to explore means for expediting transfer of needed technical information from TUGCO to TRT and other general administrative items.
6. H. Levine promised to provide a copy of the criteria used by TUGCO in its previous Damage Interaction Study program.
7. Mr. T. Langowski did not participate in the item 5 discussion.

The meeting was adjourned at 1:50 p.m.
