

UNITED STATES
ATOMIC ENERGY COMMISSION
WASHINGTON 25, D. C.

IN REPLY REFER TO:

40-1341
LNL:JED

Mr. Harold B. White
Mill Superintendent
Mines Development, Inc.
Edgemont, South Dakota

January 15, 1959

Gentlemen:

Commission representatives had the opportunity of visiting several mills in 1957 to gather information on the processes and potential exposures associated with the operation of uranium ore processing mills.

For your information, we are enclosing a copy of the summary report prepared from the results of the visits to these mills. The statements and suggestions contained in the report are general and do not constitute a complete evaluation of the conditions of any particular mill operation since the data are limited, in each case, to a brief period of operation and to limited areas of investigation.

Very truly yours,

J. C. Delaney
Chief, Nuclear Materials Section
Licensing Branch
Division of Licensing & Regulation

Enclosure:
Summary Report
LNL-40
