Uranium Reduction Company
P. O. Box 488
Heab, Utah

Attention: Mr. R. F. Hollis, General Manager

Gentlemen:

Thank you for your letters of June 4, 1958 and July 3, 1958.

It is noted that your company is taking action to see that radiation surveys are made in your plant at Heab, Utah.

The posting and labeling requirements of Sections 20.203(e)(2) and 20.203(f)(2) are based on the quantity of uranium contained and not on the resultant radiation level. These sections, therefore, apply in your mill. We call your attention to item B of our letter of May 23, 1958.

It is requested that you supply this office within 30 days an estimate of the date radiation surveys will be completed at your plant and the action you are taking to comply with the posting and labeling requirements.
