Gentlemen:

This refers to your September 10, 1985 report of investigation findings and corrective actions requested by this office in letter dated July 12, 1985 as a result of allegations received concerning unsafe practices in the handling of radioactive solutions in your Microbiology Department.

We have evaluated your report and corrective actions and have determined that no additional investigation by our office is warranted at this time. While your investigation substantiated the allegation of mouth pipetting, as specified in the enclosed Appendix, your followup and corrective actions have been found adequate and no further response is required on your part.

The specific allegations, your investigation findings and corrective actions, and our conclusions are included in the attached allegation followup report. The effectiveness of your corrective actions will be reviewed during your next routine inspection.

We will gladly discuss any questions you have concerning this matter, and appreciate your continued cooperation.

Sincerely,

8509300119 850925
