6. There are no planned changes in organization, location, facility, equipment, or operating or emergency procedures.
7. There are no changes in the use, possession, location or storage of the licensed materials.
8. Other than the change of ownership as set forth herein, there are no changes in organization, location, facilities, equipment, procedures, or personnel that would require a license amendment.
9. All surveillance items and records including radioactive material inventory and accountability requirements (calibrations, leak tests, and surveys) were current as of the time of transfer. All surveillance items and records remain current.
10. All records concerning the safe and effective decommissioning of the facility, public dose and waste disposal by release to sewers, incineration, radioactive spills, and on-site burials, have been transferred to the new licensee.
11. Studies using licensed material are ongoing at Barberton Citizens Hospital. Area surveys including monitoring for contamination are conducted as required. No areas of contamination have been identified.
12. No areas of contamination have been identified. Past activities at Barberton Citizens Hospital have been conducted with no cost incurred for decontamination. This is anticipated to continue. Responsibility for any clean-up at the time of transfer will be assumed by Barberton Health System LLC.
13. Transferee agrees to abide by all commitments and representations previously made to NRC by the transferor concerning maintaining decommissioning records, implementing decontamination activities and decommissioning of the site, and corrective action for open inspection items and enforcement actions.
14. Barberton Citizens Hospital and Barberton Health System LLC have agreed to the change in ownership and control of the licensed material and activity.
15. Barberton Health System LLC agrees to abide by all constraints, conditions, requirements, representations and commitments stated in the existing license.

Dear Mr. Bernatovicz:

Enclosed is Amendment No. 23 to your NRC Material License No. 34-01922-02 in accordance with your request.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please note: we have added five years to the expiration date listed on your license. You will be receiving official notification from our headquarters office explaining the cause for the five-year extension in a few weeks. In the meantime, if you have any questions, please call me.

Also, please note we have changed the name on the license, as you requested, to reflect the change in ownerships.

Please be advised that your license expires at the end of the day, in the month, and year stated in the license. Unless your license has been terminated, you must conduct your program involving byproduct materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Notify NRC, in writing, within 30 days:
  - a. When an authorized user or Radiation Safety Officer permanently discontinues performance of duties under the license or has a name change;  
or

302051

- b. When the licensee's mailing address changes (no fee is required if the location of byproduct material remains the same).
3. In accordance with 10 CFR 30.36(b) and/or license condition, notify NRC, promptly, in writing, and request termination of the license when you decide to terminate all activities involving materials authorized under the license.
4. Request and obtain a license amendment before you:
  - a. Receive or use byproduct material for a clinical procedure permitted under Part 35 but not permitted by your license issued pursuant to this Part;
  - b. Permit anyone, except individuals described in 10 CFR 35.13(b), to work as an authorized user under the license;
  - c. Change Radiation Safety Officers;
  - d. Order byproduct material in excess of the amount, or radionuclide, or form different than authorized on the license;
  - e. Add or change the areas of use or address or addresses of use identified in the license application or on the license; or
  - f. Change ownership of your organization.
5. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date of your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of byproduct material after your license expires is a violation of NRC regulations. A license will not normally be renewed, except on a case-by-case basis, in instances where licensed material has never been possessed or used.

In addition, please note that NRC Form 313 requires the applicant, by his/her signature, to verify that the applicant understands that all statements contained in the application are true and correct to the best of the applicant's knowledge. The signatory for the application should be the licensee or certifying official rather than a consultant.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Policy and Procedures for NRC Enforcement Actions. Since serious consequences

M. Bernatovicz

-3-

to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

Dear Licensee:

In response to your request, we have completed the initial processing, which is an administrative review of your application for a(n):

☐ New License      ☒ Amendment      ☐ Renewal

Administrative deficiencies were identified during this initial review as outlined below. However, it should be noted that a technical review may identify additional omissions in the submitted information.

It appears that your request is routine (see 1-3 below as applicable).

Incomplete information is as follows: In order for us to complete your request an amendment is needed with the required fee. Please contact our License Fee & Debt Collection Branch, located in our headquarters office, as referenced below, to obtain the correct fee amount.

1. New and amendment actions are normally processed within 90 days, unless we find major deficiencies, or policy issues requiring central program office assistance.
2. Renewal actions are normally processed within 180 days, however under timely filing (before expiration) you may continue to operate under your existing license.
3. Termination actions are normally processed within 90 days, unless confirmatory surveys following decontamination/decommissioning activities are involved.

A copy of your correspondence has been forwarded to our Licensing Fee and Debt Collection Branch (301/415-6097) for approval of the fee category and amount, if required.

If you have a compelling safety or business-related reason for requesting expedited review, please contact the Materials Licensing Branch at (630) 829-9887. We will try to complete your request as soon as practicable. Any correspondence about this request should reference the control number.
