NOTICE OF VIOLATION

University of Illinois at
Urbana - Champaign

License No. 12-00330-05

As a result of the investigation conducted by the University of Illinois (as requested by this office in letter dated July 12, 1985) and in accordance with the Interim Enforcement Policy, 45 FR 66754 (October 7, 1980), the following violation was identified:

License Condition No. 28 requires that licensed material be possessed and used in accordance with statements, representations and procedures contained in referenced documents. Referenced Radiation Safety Manual, Page 5, Section C.10 (received May 11, 1985) specifically prohibits pipetting by mouth in any radioisotope laboratory.

Contrary to the above, the licensee has identified the use of mouth pipetting ("mouth actuated techniques") in the use of radioactive materials in some radioisotope laboratories.

This is a Severity Level IV violation (Supplement VI).

The licensee's investigation showed that action had been taken to correct the identified item of noncompliance and to prevent recurrence. Consequently, no reply to this item of noncompliance is required and we have no further questions regarding this matter.
