Dear Sir:

In References 1 and 2, the Nuclear Regulatory Commission (NRC) issued Orders requiring modification of the James A. FitzPatrick Nuclear Power Plant to comply with Criteria contained in Appendix A to NUREG-0661.

The New York Power Authority submitted the Plant Unique Analysis Report for the torus structure, support system and internals in Reference 3. Reference 4 included the second part of the Plant Unique Analysis covering the evaluation of the piping system attached to the torus.

Attachment 1 is a copy of Revision 1 of the Plant Unique Analysis Report of the Torus Suppression Chamber. Attachment 2 is a copy of Revision 1 of the Plant Unique Analysis Report of the Torus Attached Piping. These reports incorporate responses to questions raised by the NRC and its consultants and other changes as summarized in the Record of Revisions included in each report. These revisions do not change the previous conclusions. The attached copies are included for information as requested by your staff during our review meetings.

If you have any questions, please contact Mr. J. A. Gray, Jr. of my staff.

Very truly yours,

John C. Brons
Senior Vice President
